

Environment Policy

Scope

As a small security company our work is mobile and takes us to various venues and sites across the UK. Our company adapts to each environmental policy unique to the work environment of our clients as well as our own.

Focus

Our primary focus is to comply with the ISO 14001 Environmental Management System and relevant legislation.

Key Commitments

Waste Management – Recycling and Efficient Resource Use.

- Communication, invoice, banking and document storage and archiving are done electronically.
- Printing is only where necessary.
- Office equipment such as plastics, batteries, metal, glass are recycled by licenced carriers. Stationary and scrap paper is reused.
- Food waste from office site and work sites is composted.

Sustainable Transport – Pollution prevention.

- Public transport to work sites, events, meetings. Car-sharing to minimise number of journeys when public transport is not possible.
- Team management are provided equipment and work from home.
- Venues of work sites are in closer proximity to Head office and available workers.

Energy

- Lights and office equipment are switched off when not in use.

This policy is subject to review annually and amended at any time in compliance with environmental laws and procedures.

Statement

I declare that the above Environmental policy is true and compliant under environmental laws. This policy is amended to fit WL Risk Management Ltd.'s current scope and will be subject to change where necessary under
