

Environmental Policy

Wlriskmanagement provides manned guarding, event security, lock-up, and alarm response services. We are committed to minimising our environmental impact, complying with all relevant UK legislation, and following the principles of the ISO 14001 Environmental Management System.

Key commitments:

- **Waste & Resources:** Operate paperless systems where possible, reduce paper use, reuse stationery, and recycle office/site materials through licensed carriers.
- **Energy Efficiency:** Reduce electricity consumption by switching off lights/equipment when not in use and promote staff awareness of energy-saving practices.
- **Sustainable Transport:** Use public transport and car-sharing where possible, deploy local staff to minimise travel, and transition towards low-emission vehicles.
- **Biodiversity & Community:** Ensure operations do not disturb wildlife habitats or heritage grounds and encourage responsible behaviour by staff and visitors at events.
- **Ethical Procurement:** Source Fairtrade or sustainably produced goods where possible and prioritise local suppliers to reduce environmental impact.

Continuous Improvement (ISO 14001 principles):

- Identify, manage, and reduce our environmental impacts.
- Monitor progress and review this policy annually.
- Train staff to adopt environmentally responsible practices.

Wlriskmanagement is committed to protecting the environment, reducing waste and energy use, and contributing to sustainable communities.
